

Assignment Submission

Sample Submission Document

Assignment	Object-Oriented Programming – Mini Project
Class	Class 9 – Computer Science
Subject	Computer Science
Student	Tarek Alam Bhuiyan
Student ID	STU-2026-001
Teacher	Md. Rahman
Submitted On	08 August 2026
Status	Submitted

Submission

This sample submission demonstrates how a student can submit an assignment through the Assignment Management System. The document contains the student's answer, supporting explanation, and a reference to the submitted work.

Answer / Work Submitted

Topic: Principles of Object-Oriented Programming

Object-oriented programming (OOP) is a programming paradigm based on objects and classes. The four fundamental principles are encapsulation, abstraction, inheritance, and polymorphism. Encapsulation keeps data and related methods together while controlling access to internal state. Abstraction hides unnecessary implementation details. Inheritance allows a class to reuse properties and behavior from another class. Polymorphism allows the same interface or operation to behave differently depending on the object using it.

Student Notes

I used practical examples to explain each OOP principle and reviewed the assignment requirements before submitting the work. The submitted answer was prepared specifically for this assignment.
